CORE

The Core Registry collects a core data set for a wide range of rare bone and mineral conditions. The data collected will be used to improve clinical care as well as research and oversight to data access is provided by the [Data Access Committee](#). The Core Registry will also advise participants on other suitable studies and registries. As the Core Registry has been functional within EuRECa since 2019 it has been approved by the National Ethics Service and Information Governance authorities in the UK. This is the reason EuRR-Bone could embark the Core registry quickly and the registry is open for rare bone and mineral conditions.
